

Easy, accurate, automated invoice data extraction

Processing invoices is cumbersome when your users key in data manually. Emburse Chrome River's integrated OCR Vision module employs the latest machine learning-based optical character recognition technologies. It quickly and accurately extracts vital data from invoice images, saving your team time and effort.

Submit and scan in a snap

Users can drag and drop images into OCR Vision for automatic processing, which is embedded within the Chrome River Invoice solution. Invoices can also be submitted via email, either from your suppliers or users.

ELIMINATE MANUAL HANDLING AND REVIEW

Improve processing cycle times and lower costs by automatically extracting data from a wide range of invoice layouts.

A SOLUTION THAT LEARNS FROM YOU

Continually improve accuracy with each invoice processed as the algorithms learn your data patterns, which traditional OCR engines can miss.

A SIMPLER WAY TO SUBMIT

Anyone within your enterprise can use OCR Vision with no additional training. All they have to do is upload an image file (JPG, PNG, PDF). The algorithms take care of the rest.

Accelerate invoice processing with accurate OCR data extraction

FAST AUTOMATED, ACCURATE DATA EXTRACTION

Near real-time data extraction in eight languages, capable of training and certifying the system in more. Automatic mapping of extracted line item data to PO items such as unit price, quantity, etc.

VALIDATE DATA, IDENTIFY MATCHING ISSUES

Validate invoice data such as vendor name, address, and requester against your master data sets. Systematically identify PO-to-Invoice line item matching issues to be resolved via our compliance rules engine.

EMPOWER YOUR FINANCE TEAM

Any team member can benefit from the efficiency, power, and automation of our easy-to-use OCR technology to extract invoice data.

OCR Vision features

EXTRACT RELEVANT INFORMATION

OCR Vision reads images, pulls text, and validates the resulting data like invoice number, date, amount, vendor, and PO number.

PULL LINE ITEM DETAILS

When a valid PO number is found, OCR Vision gathers relevant line item data, including unit price, quantity, and extended price.

INTEGRATES WITH RULES ENGINE

Invoice data flows through our compliance rules engine, where PO-to-Invoice item matching issues are identified for resolution.

PROCESS DATA FASTER

OCR Vision provides a swift, accurate solution that automates capturing and extracting invoice data accurately.
