

Capture and Upload Receipts Anywhere Anytime

Chrome River **SNAP**

Managing a stack of paper expense receipts during a business trip can slow down the expense report creation and submission process. But with Chrome River SNAP for Android and iOS smartphones, business travelers can quickly and easily capture and upload receipt images directly to the Chrome River EXPENSE Receipt Gallery from anywhere.

As a purpose-driven app that enhances Chrome River EXPENSE, Chrome River SNAP simplifies capturing paper receipts and decreases the amount of time necessary to create an expense report later. Business travelers can create reports faster because receipt images will be available in the Receipt Gallery quickly and can be added to any pre-existing or new expense report within Chrome River EXPENSE.

Efficient Expense Report Creation

Users can snap and upload the receipt images quickly to the Chrome River EXPENSE Receipt Gallery. Chrome River’s powerful OCR then extracts the expense data for use in an expense report. This is the same powerful automated OCR Chrome River applies to receipts uploaded directly to Chrome River EXPENSE.

No Internet? No Problem.

Whether you have a connection or not, you will be able to use Chrome River SNAP. There may be times when a mobile data connection is temporarily unavailable and in this case, the image will remain in Chrome River SNAP until you are in a location with a stronger connection, and it is then uploaded.

Separate Business and Personal Images

Once receipt images are uploaded to the EXPENSE Receipt Gallery, they’re automatically deleted from your phone, freeing up your device’s storage space. And to avoid cluttering up your device’s photo storage, Chrome River SNAP does not mix receipt images with your personal photos.

This makes submitting expenses extremely easy, especially on the go. The most recent update has made it even easier to take pictures of expenses and immediately upload them.

VORNADO REALTY TRUST

The Easiest Way to Submit Receipts

Add Receipt Images Seamlessly

Captures receipt images and uploads them quickly to the Chrome River EXPENSE Receipt Gallery from the user’s smartphone.

Add to Expense Report

Receipts uploaded and stored in the Receipt Gallery can be added to any new or pre-existing expense report in Chrome River EXPENSE.

Powerful OCR Data Extraction

Chrome River’s OCR data extraction and intelligent rules-based assignment logic will create expense items from uploaded receipts automatically.

Share Images from Default Device Apps

With Chrome River SNAP installed, users can share receipt images taken with third-party camera apps directly to the Chrome River EXPENSE Receipt Gallery.
