

# Emburse Global Reimbursements – transparent and cost-efficient employee reimbursements

## EMBURSE PAY

Modern financial management tools are essential for your business, to help maximize profits and keep costs low. Organizations have historically relied heavily on traditional banks to manage their payment processes, but this can often come with high transfer fees, inflated exchange rates and consistently slow transfers. You could lose over \$60 or more on a \$2000 transaction and wait as long as five days for a transfer with a traditional bank.

**There is a better way.**

As part of the Emburse Pay program, Chrome River offers Emburse Global Reimbursements, powered by TransferWise. This modern alternative allows global organizations to streamline their employee expense reimbursement processes to reduce costs, increase efficiency and easily manage their payments. Transparent fees and no exchange rate mark-ups save your business over 60% of the overall international transfer cost and dramatically speeds up the delivery of funds with a 1-2 business day turnaround.

### Create Efficiency

Emburse Global Reimbursements, powered by TransferWise, allows your organization to process thousands of expense reimbursements all in one transfer and disburse to recipients around the world.

### Drive Insight

Transparent fees and better payment visibility give your teams the insight they need to understand costs up front and easily track payments.

### Increase Agility

Employees get paid faster and more frequently wherever they are in the world, giving them the agility to access funds sooner and let business flow.

*Reimbursing our employees with Emburse Global Reimbursements will give us considerable cost savings, as well as supporting our employees by getting funds back in their accounts up to 90% faster than before.*

EMILY MURRAY,  
ACCOUNTING MANAGER AT CLASSPASS

## Features

### Modern Convenience

Emburse Global Reimbursements, powered by TransferWise, works with the bank of your choice for seamless, low-cost and prompt delivery of payments to reimburse employees wherever they are, in their local currency.

### No Hidden Fees

Never worry about hidden exchange rate markups again. Emburse Global Reimbursements gives you the real mid-market exchange rate, every time.

### Payment Visibility

Monthly statements allow you to easily review all of your payments by date and download a file of your transfers for total spend visibility.

### Batch Payments

The batch payment tool allows you to process multiple expense reimbursements at once to several different employees around the globe by simply uploading a file.
